Re: Diverting Control Structure  
South Mesa - Mill Creek

Dear Doug:

It is my understanding that you have yet to install an operational diverting structure on Mill Creek for the South Mesa Diversion. I assumed this would be done by this time. I am writing to encourage you to pursue this matter to its completion. No water will be diverted in 1990 unless a structure is in place to allow for the accurate delivery of your water. The present method of diverting water is not acceptable.

Again, I would encourage your immediate attention and cooperation in resolving this situation. Our position is firm with regards to this matter. If you would like to discuss your plans, please feel free to contact me at your convenience.

Respectfully,

Mark P. Page  
Area Engineer
